Publisher : Yellow River Water Conservancy Publishing House Pub. Date :2010-09-03. This book is the use of mathematical principles to solve hydrological problems of the comprehensive integration of various research methods. basic statistics from the hydrological characteristics of the process of starting to mathematical probability and statistics based on the principle. In recent years hydrological analysis to predict a large number of applications in the gray theory. fuzzy mathematics. neural networks. wavelet transform. fractal and chaos theory and other mathematical methods into a unified Statistical Hydrology system into. Arrangements in the structure. taking into account the development of statistical theory hydrology hydrological processes in people s grasp and understanding of the gradual deepening of the process. basic to the development of hydro-order statistical theory based scheduling. Introduce the basic mathematical principles on the basis of a lot on current research activities that often appear in the classic application examples. Book for a mathematics-based undergraduate hydrology. meteorology. seismology. agriculture. economic and other disciplines involving time series forecasting researchers and business people use and reference. can also be used as the graduate teaching. Contents: Preface first solar radiation and moisture transport during the first chapter the basics of hydro-physical marine radiation and evaporation Chapter II Chapter III of atmospheric water vapor transport in the physical process of second reference physical processes of precipitation and cold cloud Chapter Nuanyun micro- physical process cumulus dynamics equations Chapter VI of the physical mechanism of topographic effects on precipitation References third physical process underlying surface evaporation Chapter VII of the Earth s surface energy and hydrological balance of Chapter VIII of the atmospheric surface layer turbulent transport section IX underlying surface evaporation calculation reference...
