High-quality information and a professionally edited book Why Would You Want to Make Your Own Soap? Most soap available in stores today are not really soaps at all, but, they are detergents. Detergents are a petroleum based product, like gasoline and kerosene. Detergents tend to leave your skin feeling dry, itchy and tight. Alkali, the most common irritant in soap, is commonly blamed for this effect. Other ingredients in mass-marketed soap have been proven harmful to human health and can cause severe skin irritations in many people. These include ingredients such as DEA, Isopropyl Alcohol, BHT and Triclosan. The most common ingredient in conventional bar soaps is sodium tallowate. Some very famous brands of soaps use chemicals which are of an inferior quality and could prove harmful for a person's skin. Here's a look at some of the benefits and reasons for using handmade, chemical free soaps: *Handmade Soaps are generally made using cold process method which lets the...
